III. DETALJNI PODACI O KOLEGIJU	
Jezik na kojem se nastava održava	Engleski

Opis kolegija	The Encyclical Letter <i>Laudato si'</i> of the Holy Father Francis on Care for our Common Home is not just addressed to the Catholic Church and its members, but to all people, and especially to all the structures of society in the 21st century that are involved in actual questions about the protection of the environment, energy efficiency, and harmless production technology. It promotes guidelines on integral ecology which, alongside theological and philosophical comprehension, includes an understanding of other humanistic and natural sciences. It means that the Encyclical Letter presupposes interdisciplinarity. This course explores the basic principles of integral ecology suggested by <i>Laudato si'</i>: mutual connections of ecology, economy and poverty and understanding of human development. Integral ecology is based upon the Christian knowledge of man and God. That means that integral ecology is founded on the principles of Christian anthropology.
---------------	---

cultural ecology, and the ecology of everyday life. So, to have a critical approach to global climate and environmental crisis, elementary knowledge of the environment, ecology, economy, sociology, and theology is required. All scientific methods will be explored inside the concept of integral ecology.

Očekivani ishodi učenja na razini kolegija

1. To specify definitions of basic notions related to climate and ecology. 2. To identify the essential elements and principles of integral ecology. 2. To present Biblical texts and texts from the Encyclical Letter *Laudato si'*. 3. To apply the principles of integral ecology. 4. To relate the fundamental issues of ecology, economics, and poverty that are mutually connected. 5. Critically evaluate different ecological approaches.
